

PHARMECOLOGY®

USP<800> Assessment of Risk

November 1st is only the beginning!

PharmEcology® understands the importance of conducting a USP <800> Assessment of Risk for the safety of all healthcare staff.

PharmEcology's Assessment of Risk Portal provides the following features and benefits:

- Trusted partnership, powered by data, designed by experienced pharmacists
- Dynamic database updated weekly of all NIOSH drugs, proposed and potential
- Customization of your organization's PPE decisions at the NDC level
- Continuous access to web portal reduces compliance risks from outdated spreadsheets and facilitates successful accreditation surveys

"While we had already completed some of the basics around USP <800> compliance, PharmEcology's systematic approach and documentation tools have enabled us to identify gaps in the process."

—Matthew Wolf, PharmD, MS, BCSCP
